Nomination Guidelines for SFRR-I Lester Packer Award Lecture 2020

SFRR-International Biennial Lester Packer Award Lecture 2020

We are seeking nominations for the SFRR – International Lester Packer Award Lecture 2020 to be given at the 20th SFRR – International Meeting (hosted by SFRR-Asia) in Taiwan 17-20 March 2020. Further information for this meeting is available from the website: <http://www.sfri2020.org>

The Lester Packer Award is a new award sponsored by SFRR – International to be awarded on a biennial basis to a scientist, who throughout her/his life's work in the judgment of the International Scientific Committee, has made an outstanding contribution to redox biology and medicine. It was set up in memory of Lester Packer, an innovative scientist who dedicated his life and efforts to the development of redox networks around the world.

The award consists of a plaque and certificate, and it is a requirement that the recipient present a lecture at the Biennial meeting where the award is made. Present and past members of the Executive Committee of the Oxygen Club of California, of which Lester Packer was the founder, are not eligible for this award.

Once nominations have been received, the SFRR – International Executive Committee and members of an International Scientific Committee will evaluate these nominations and select the Lester Packer Award Lecturer for 2020.

Deadline for receipt of nominations by email is 1 September 2019.

Please disseminate this 'Call for Nominations' to your membership, who should then forward their nominations to their respective regional SFRR Society Executive.

Nomination(s) together with the nominee's abbreviated CV and list of up to 10 peer-reviewed publications should be emailed as a **single PDF file** to Patricia Oteiza (Email: poteiza@ucdavis.edu).

Prof. Patricia I. Oteiza
Secretary General SFRR – International
